SUMMARY

Laravel developer with production experience on a multi-tenant field-force SaaS platform used by 100+ clients and 2,500+ active users. Strong in REST API design, MySQL/MariaDB query optimization, and role-based access control. Upgraded a live production system from Laravel 7 to 13 and implemented Redis. MCA graduate (2026) who ships features end-to-end, from schema design to dashboard.

TECHNICAL SKILLS

- **Core:** PHP, Laravel, MySQL/MariaDB, REST APIs, Redis, Eloquent ORM, Blade, JavaScript, HTML5, CSS3, Tailwind CSS, Bootstrap
- **Practices:** Authentication and RBAC, multi-tenant data isolation, schema and query optimization, Laravel and PHP version upgrades, Git/GitHub
- **Working knowledge:** React, Node.js, TypeScript, MongoDB, Flutter/Dart
- **AI-assisted development:** OpenAI, Claude, Gemini, Antigravity

EXPERIENCE

Laravel Developer | EliteEvince Technology | Jan 2026 – Present

- Develop and maintain UpTeams, a multi-tenant field-force SaaS combining SFA, CRM, HRM, and GPS visit tracking, used by 100+ clients and 2,500+ active users.
- Upgraded the live production system from Laravel 7 to Laravel 13, including the PHP version upgrade and web library upgrades, keeping the platform on current, supported versions.
- Built HRMS features, task management with recurring tasks, visit management, and performance management modules for field teams.
- Implemented Redis to improve application performance and scalability.
- Optimized MySQL/MariaDB schemas and queries across CRM, HRM, and task modules to handle growing application data.
- Designed and integrated REST APIs connecting the Laravel back end to front-end dashboards and third-party services.
- Implemented authentication, authorization, and RBAC to isolate tenant data across roles and client accounts.

PROJECTS

ServiceBook: Online Service Booking and Management Platform | Laravel 12, PHP, Blade, Tailwind CSS, MySQL, REST API, Chart.js

- Built a multi-industry booking platform (salons, fitness, healthcare, pet services, repair) where customers discover providers and book and manage appointments.
- Implemented RBAC with separate customer, provider, and admin permissions.
- Built provider dashboards with Chart.js showing bookings and performance trends.

Beauty Parlour Management Platform (Multi-Tenant) | React, Node.js, TypeScript, Tailwind CSS

- Built a multi-tenant web application for beauty parlours, where each parlour operates in its own isolated workspace on a shared platform.
- Developed the front end in React and TypeScript with Tailwind CSS, backed by a Node.js API.
- Used AI-assisted development tools to speed up building, debugging, and iterating on features.

Patient Appointment System | Laravel, PHP, MySQL, Bootstrap, JavaScript

- Developed a role-based scheduling app for doctor-patient appointments with full CRUD workflows for doctors, patients, and appointments.
- Secured access with session-based authentication and built responsive Blade templates for desktop and mobile.

Event Management System | Laravel, PHP, MySQL, Bootstrap, JavaScript

- Built an event registration and management app with admin, organizer, and attendee views, covering events, bookings, and admin controls.
- Added SweetAlert-based feedback to improve the user experience.

EDUCATION

- **MCA**, LJ University, Ahmedabad — Mar 2026
- **BCA**, Hemchandracharya North Gujarat University, Patan — 2024 (CGPA 7.25)
- **HSC** (Gujarat Board), S.C.W. High School, Deesa — 2021 | **SSC** (Gujarat Board) — 2019
